

COMPARISON TABLE

USE-CASE	INPUT	EXPECTED OUTPUT	LIMITATION AND IMPROVEMENTS	IMPROVEMENT REASON
AI –EMAIL ASSISTANCE	Citizens email+ key facts	Professional email+ correct tone under 150 words	Limitation: AI does not know new policies Improvement: Add new policies documents	Because the AI cannot know the new policies on its own, connecting it to new policy documents keeps it up to date.
AI REPORT SUMMARIZER	Long report (such as quarterly budget report)	Summary with proper headings, sections and page numbers	Limitation: May not understand some formats (charts, tables) and may leave out important points Improvement: Instead of guessing it should flag the gap and add a note about what was excluded	Misread formatting is the cause of inaccurate summaries so AI should flag anything it can't interpret instead of guessing or misinterpret it. Human review ensures accountability and reduces risk of missing important information

AI MEETING NOTES GENERATOR	Meeting rough notes or meetings transcripts/ Video transcripts	A formatted document with all attendees, topic discussed and list of action items	Limitation: Sending meetings transcript to AI may create privacy risks. Video meeting transcript may cause error when converted to text. Improvement: Use AI for only non-sensitive meetings and automate the zoom meetings with AI	This protects confidential information. Connecting the AI to zoom to automate transcription also reduces manual work and background noises errors
AI DOCUMENT Q&A ASSISTANCE	Policy documents with and specific question	A direct answer and reference of the section from where we get it	Limitation: It may guess answer if not in document, difficult to process long document it takes time Improvement: It should tell directly information not available in document	Instead of giving a wrong or guessed answer it should state that this part is not present in document.
AN IDEA GENERATOR FOR PUBLIC SERVICES	Problem description that need to be solved	List of ideas with implementations	Limitation: Idea may be too generic or already tried Improvement: use historical data to avoid getting same idea	The AI has no memory of past initiatives, giving data directly makes it easy for AI to understand your output by not giving tried ideas.
