

Prompt Comparison Table

This table shows the difference between my basic, improved, and professional prompts for each use case.

USE CASE	Weakness of Basic Prompt	Gain from Improved Prompt	Key Technique in Professional Prompt
Summarizing a Policy Document	Only asks for a summary,no structure or key terms mentioned	I added in my prompt to highlights important terms and key details	Headings + page numbers + plain-language term explanations
Extracting Key Points from a Report	In this prompt no headings or limits; could include unrelated info.	Groups points under the report's original headings.	Page numbers + term explanations + strict sourcegrounding (no outside info)
Generating Meeting Minutes	It's just a plain paragraph with no decisions or action items.	I added bullet points, technical terms, decisions, and action items.	Role prompt (professional assistant) + formal tone + headings + referenced documents
Creating a Project Proposal	It gives the basic proposal with Basic headings, no real depth.	I added sections to covers all major parts of the proposal in a structured form.	Business consultant role + persuasive tone + evidence only claims
Writing a Professional Email	I have written a general prompt with no recipient or real detail.	Adds recipient, subject line, and full structure	Exact numbers + specific request + word limit + reply to deadline

Analyzing a Dataset	Just a list of findings there is no method behind it.	Adds row/column counts, trends, and outlier check.	Data analyst role + data quality checks + hallucination guard
Creating Social Media Captions	Short and generic captions with no hashtags.	I added a fun tone and hashtags to make output more engaging .	Word limit + specific named hashtags + closing emoji
Generating Chatbot Responses	Reply might not guide the patient properly.	Tells the patient to consult a professional when needed.	Doctor info + appointment booking + emergency handling
